

Centrus E-mail Subscribers Technical Announcement

January 2005

To: *All E-mail Subscribers*

Ref: *CAA000T2105*

**THIS DOCUMENT CONTAINS CRITICAL TECHNICAL INFORMATION!
If necessary, forward this letter to the appropriate technical person in your organization.**

Dear Centrus E-mail Subscribers:

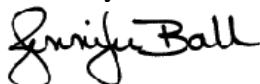

The current Centrus Web site will be moving to the Group 1 Web site, <http://www.g1.com/>, within the next two weeks. Our records indicate that you are subscribed to one of the Centrus e-mail notification lists – Send All Information or Send Critical Information Only. To continue receiving these updates concerning Centrus products, please visit the Group 1 Web site, log in to Support and click on List Services.

List Services provides customers with the opportunity to receive notification through self-subscribing email distribution lists when product-related information is available. Instructions on subscribing to these lists are available on the Web site under the List Services option. Please remember that you will need your Group 1 User ID and password to access the secure area of the site. If you do not have a User ID and password or if you have forgotten them, go to the Group 1 Support Web site, <http://www.g1.com/Support>, and click on the "Do you need your User ID and password?" link under Useful Information.

Subscribers to the Centrus/Geo List Services receive an e-mail identifying the reference number of the correspondence distributed to Centrus customers. The document corresponding to the reference number is posted on the Group 1 Web site under Support, Documentation, Customer Communications. Group 1 and Centrus will not transition the current lists. Please go to the Group 1 Web site and self subscribe to continue to receive e-mail updates.

If you have any questions, please create a service request by going to <http://www.g1.com/Support> and logging in to Support. Under the Technical Support heading, click eService/Knowledge Base. You may also contact us by telephone at **1-800-367-6950** options **1-4** to be connected with a Centrus Products Technical Support Representative.

Sincerely,

Jennifer Ball
Manager, Technical Support
